Filing Date: 2/17/2004;

Applicant: Mock et al.

Examiner: Alexander Williams

Applicant's election with traverse of species III, figures 5A-5G (claims 1 to 20), filed 10/11/05, has been acknowledged. Application arguments have been considered and this restriction requirement has been withdrawn. However, a new restriction requirement is listed below:

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to an integrated circuit package, classified in class 257, subclass 696.
- II. Claims 7-18, drawn to a lead frame, classified in class 29, subclass 17.1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being used without an integrated circuit package, but used for example in electrical connection transfer component. See MPEP § 806.05(d).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
